### **DETAILED ACTION**

This application is a 371 national stage filing of PCT/US00/12133 filed May 4, 2000.

Claims 1-15 are pending and currently under examination.

#### ***Election/Restriction***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a polynucleotide which has 70% identity to SEQ ID NO: 1, a vector containing said polynucleotide, a host cell and a method for producing a polynucleotide using the host cell.

Group II, claim(s) 8, drawn to a method for treating an individual with a compound which interacts with a sequence which has 70% identity to SEQ ID NO: 1.

Group III, claim(s) 9, drawn to a method for identifying a compound which interacts with a sequence which has 70% identity to SEQ ID NO: 1 and inhibits or activates an activity of said sequence.

Art Unit: 1632

Group IV, claim(s) 10-14, drawn to an antagonist or agonist that activates an activity of a polynucleotide which has 70% identity to SEQ ID NOs: 1, 2 or 3, and a method of using to inhibit a bacterial ribosome.

Group V, claim(s) 15, drawn to a method of treating an individual infected with a bacteria by the administration of a pleuromutilin compound with antibacterial activity.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of claim 1 of group I has been found by the Examiner to have no special technical feature that defined the contribution over the prior art because the claim as broadly written encompasses small fragments of SEQ ID NO: 1 which are anticipated by the art. Furthermore, it is noted that unity of invention between different categories of inventions will only be found to exist if specific combinations of inventions are present. Those combinations include:

- A) A product and a special process of manufacture of said product.
- B) A product and a process of use of said product.
- C) A product, a special process of manufacture of said product, and a process of use of said product.
- D) A process and an apparatus specially designed to carry out said process.

Art Unit: 1632

E) A product, a special process of manufacture of said product, and an apparatus specially designed to carry out said process.

The allowed combinations do not include multiple products, multiple methods of using said products, and methods of making multiple products as claimed in the instant application, see MPEP § 1850. In this case, multiple products and methods are claimed.

Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have single general inventive concept and lack unity of invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
